

# Analysis of the most road accident involved vehicle brands

It is the Czech way to make fun of certain vehicle brand owners, especially Renault and Peugeot drivers. In this infographic, you will find analysis of road accidents data from years 2016-2020 in several statistics. Firstly, the four most prevalent vehicle brands involved in road accidents with their accidents count are Škoda (118379), Volkswagen (44318), Ford (30925) and Renault (23491). Nevertheless, the sum of all accidents would go much higher if the accident count from all brands were summed up.

Škoda is the most popular brand of motor vehicles in the Czech Republic and their involvement is significant especially in Prague, STC (Central Bohemian Region) and ULK (Ústí nad Labem Region).

Taking into account the proportion of main cause of all road accidents, we can see that the causes are basically uniform across the most accident involved brands. A slightly larger portion of speeding Renault drivers is visible from our 5 year time frame. On the other hand, Volkswagen drivers tend to not give the right-of-way in comparison to other 3 motor vehicle manufacturers.

	2016	2017	2018	2019	2020	2021
Ford	5802	5841	5683	5661	4844	3094
Renault	4531	4503	4404	4138	3618	2297
Volkswagen	7365	7875	7974	8352	7588	5164
Škoda	20419	21272	21421	22445	19846	12976

Top vehicle brands involved in accidents by year

Lastly, a clear drop of almost 1/3 of number of all motor vehicles accidents was recorded. Curiously, there was not a significant drop correlating with the surge of COVID-19 pandemic.
